

*.....keeping  
watch on the  
industry*

Issue: #106  
Date: October 14, 2016

**Please feel free to share these photos far and wide. Please credit Ted Auch from Frac Tracker as the photographer! Thanks Ted.**

**Ted Auch** has invited you to contribute to the following shared folder:

**October 2016 IJNR**

A compilation of photos of three silica mines at various stages of activity from our gathering with the Institute for Journalism and Natural Resources group in Ludington, MI last week. The Sargent mine is one I have photographed before but never like this. I think we have some real gems and the angles of the mine from the north are pretty impressive. This is the most active frac sand mine in Michigan. We also have albums of the Nugent mine which is infrequently operating and a reclaimed Nugent pond across the street. Finally, we have Michigan natural area

**labeled Rosy Mound after the former mine's  
name which is labeled as reclamation success  
by Michigan DEQ.**

**Open**
