

AN INVITATION FOR YOUR PARTICIPATION

*.....keeping
watch on the
industry*

Issue: #141
Date: JUNE 6, 2017

Dear FRAC SAND SENTINEL READERS,

From as early as breakfast time to as late as your midnight snack, food is an integral part of our lives. As much as clean air and water are necessary for healthy lives, safe and clean food is just as important.

But what happens if the farms where our food is grown are near shale production activity?

Join Halt the Harm Network for a webinar on Wednesday, June 7 at 2:00 PM E.T. to learn about a new map created in collaboration by Citizens for a Healthy Community and the FracTracker Alliance.

Tune in to see this never-before-seen map that shows the significant overlaps between shale and food production.

Make sure to stay after the presentations to

engage in a Q&A and discussion about the map
and how you can use this tool in your work.

**NEW: What's In My Food: When Food and Shale
Production Intersect**

Wednesday, June 7 at 2:00 PM E.T.

>> Click Here to Register for the Webinar

I hope to see you there!
