

VIEW HEARING IN HUDSON-----READ THE LATEST REPORT BY THE USGS ON
WASTES IN STREAMS CAUSED BY INJECTION WELLS

*.....keeping
watch on the
industry*

Issue: #143

Date: JUNE 11, 2017

**Frac sand
mining,
processing,
and trans-
load still
pose major
issues in
Wisconsin.**

**On June 5, the Hudson, WI City Council heard
testimony from citizens and others about
processing sand. Follow this meeting at the
link below:**

In addition, the USGS has published a

scientific study on the impact of injection wells and fracking waste on streams. Be certain to take a look at it. The findings are significant. While WI does not have hydraulic fracturing activity, it is worthwhile knowing what is occurring in areas where the silica from WI is sent to open up the earth and pollute water supplies to obtain fossil fuel energy.
