Frac Sand Mining Webinar

July 25 @ 2:00 pm - 3:00 pm EDT - Free
(1:00 pm-2:00 p.m. CT)

Fracking's Hidden Connection to America's Breadbasket

Among those familiar with fracking, many are not as familiar with frac sand mining-- the process by which industry removes, excavates, and processes silica sand for hydraulic fracturing across the country.

What exactly is frac sand mining? What are its negative impacts? Where exactly is it found? How does it affect me and my health?

[Join Halt the Harm to learn from Pat Popple of Frac Sand Sentinel, dairy farmer and impacted landowner Ken Schmitt and FracTracker's Ted Auch.](#)

The speakers will speak to issues locally in Wisconsin and beyond and also discuss the current ongoing debates on impacts to health, residents, and the environment by the industry.

Make sure to stay after the presentations to engage in a Q&A and discussion about the report and how you can use this resource in your work.

**NEW: Frac Sand Mining - Fracking's Hidden Connection to America's Breadbasket
Tuesday, July 25th at 2:00 PM E.T.**
