
Subject: DEMOCRACY CONVENTION VIDEOS YOU WILL WANT TO VIEW! ISSUE # 157

Videos from the Democracy Convention are now available!

Frac sand mines, processing plants and trans-load stations have taken on a life of their own in each of many

communities impacted. Take a look at the videos recorded of the presentations given at the University of MN for the Democracy Convention Plenary Sessions held on August 4, 2017. We were fortunate to be invited to offer 3 sections and also to have them videotaped by Half Moon Education, Inc. by owner Elizabeth Feil and her skilled videographer, Tim Brennan. Thank you for your work and the opportunity to

allow the links to be seen by people located all around the USA and in other countries!

Please click on the links below and watch. Bookmark the videos and feel free to share them with many others. It is important that people elsewhere understand what frac sand mining states and people living around these large and heavy industrial locations are dealing with.

You will find them helpful in understanding recent developments in Midwest towns and counties.
