

The attached composition, written by David Steele, was read by David at a recent meeting in Augusta of the Concerned Citizens of Bridge Creek. CCBC members live in Eau Claire County, WI and are facing the intrusion of the frac sand mining, processing, and trans-load companies invading NW Wisconsin.

David Steele, Retired Attorney, has allowed me to share his comments in the Frac Sand Sentinel. I thank him for openly expressing his thoughts as well as his advice for BOARDS or governmental bodies everywhere during deliberation processes and decision making that involves many issues as well as the health, safety of the people those members are charged to protect as they serve their communities or groups.

Please read and share with others.

If you have any concerns, questions, or suggestions please send them to [sunnyday5@charter.net](mailto:sunnyday5@charter.net) or call me at 715-723-6398.

Check out the website: [www.ccc-wis.com](http://www.ccc-wis.com) New items are going up everyday; the air quality monitor information as well as many resources may be of help to you as you learn about frac sand mining, its connection with the hydraulic fracturing industry and the many concerns raised by people from several states.
