**I'm trying to save as many lives as I can from living this daily
HELL I live in from inhaling Methane/Natural Gas**

My toxins clog up in my lymph nodes and glands and during these episodes, my pain is excruciating, my legs swell up with **toxic** edema, becoming hard as a rock, (different then pitted edema) I can NOT urinate, can only eat dry popped corn and drink water as I can NOT digest food, my head feels like a sledge hammer is pounding it from both sides, my Blood Pressure goes up to 200/106 and stays there consistently for three days or longer and my pulse drops, when my BP is starting to come down, my pulse goes to 130 beats per minute, I am freezing cold, then the liquid diarrhea starts and then profuse perspiration from head to toe, leaving my clothing and bedding saturated, at this stage, I know some of the toxins have been released from my lymph glands. I am usually in bed for about 10 days before going through all the stages, leaving me in a completely exhausted state. These episodes happen frequently. The toxins have also affected my Cholesterol level skyrocketing it.

My Internist Dr John Milliken use to tell me that I had the BEST Cholesterol of any of his patients and asked me what I did to keep it so PERFECT. Inhaling Natural/Methane Gas has destroyed my ability to control it now. The toxins have also affected my weight

gain.

My Internist for over 35 years was **Dr John Milliken**, brother of former **Governor William Milliken** in Michigan and these two brothers were friends of my husband **Dean W. Seger MD**. **Dr John Milliken did 118 injections and scratch tests on my back to see what I was allergic to, only ONE thing, household dust.**

After inhaling Methane Natural Gas for so many years, I am now allergic to everything and have difficulty breathing daily. My lungs are full of numerous identified toxins that are found in Methane/Natural Gas. I carry carbon masks with me as I never know when I will encounter an odor that will take away my breathing ability.

My head hurts constantly, it feels like worms crawling in my brain and like I am wearing a tight swimming cap, affecting my eye sight, this is a DAILY feeling, but when my toxic episodes happen, it gets WORSE and I have to remain in a horizontal position, as I lose my balance. People have told me when visiting me, they have watched the blood drain from my face when I have one of my many different episodes/spells, that leave me dizzy and I must lay down. I never know when these spells will hit me.

I can NOT attend family functions, or any form of public functions as I am too ill. I have five children and their spouses and sixteen grandchildren and they all see me go through this HELL and remember when I use to be the leader of all our activities and my grandchildren keep asking,

"when is grandma going to get better?"

Noises grate on my nerves and I can NOT attend my grandchildren's activities as I can NOT stand the noise, or the "busy" activity, especially when at a sport game and the fans start stamping their feet on the bleachers, causing me to have to leave a game as the pain in my head is excruciating from the noise, this is

caused by the Toxins grating on my nerves.

If I could transfer my life of HELL from inhaling toxic Methane/Natural gas in my home to the executives of the Oil/Gas Companies and the Politicians supporting these Companies, I can assure you, they would change their LIES about stating, that neither Fracking, or Methane/Natural Gas is NOT toxic, or harmful to humans, or the environment.

The amount of money Oil/Gas Companies are paying property owners for leasing to Frack on their land will be the BIGGEST NIGHTMARE the property owner ever encountered and the loss of their health and the devaluation of their property as NO ONE will want to buy contaminated land.

Tornados and hurricanes leave destruction and costs billions of dollars, that is just the tip of the iceberg when it comes to paying the medical bills for the people living where the fracking toxic chemicals will reach them as in time they won't be able to work, will need financial assistance, food stamps, medical coverage, etc.
