

The Frac Sand Industry is having a profound impact upon the streams, creeks, rivers, groundwater and surface water supplies including wells and drinking water sources.

Please mark the date of April 25, 2015, on your calendar as a special date for your groups or for you as an individual. During Earth Week in April, Ojibwe Women, led by Sandra Day, will participate in the Chippewa River Waterwalk beginning 5 days before gathering in Wabasha, MN at the mouth of the river for the 10th Anniversary of the Aldo Leopold Celebration. Stops will be made along the way in various areas of the trip. As we know it now, the Chippewa River is affected or will be potentially impacted by its tributaries as pollutants accumulate at its mouth. Your group may find this time as an appropriate time to walk, bike or canoe along portions of the River and also participate in activities in Wabasha. More details will be forthcoming. Please call the phone numbers listed in the poster if your group would like to know how you can participate. Attendance from all over the State of Wisconsin and surrounding states is encouraged.

WATCH FOR FUTURE ANNOUNCEMENTS AS PLANNING UNFOLDS-PLEASE FEEL FREE TO MAKE COPIES OF THE ATTACHED POSTER AND POST IN YOUR COMMUNITIES. DISTRIBUTE WIDELY!

Chippewa River

WATERWALK

Earth Week 2015

With every step,
we will be thinking of
and praying for the water.
Nibi, water, has given
us life and now we will
support the water.

-ANISHINAABE ELDER SHARON DAY
