

Subject: CHECK OUT THE PROJECTIONS ON LIFE EXPECTANCY! EXTEND AN INVITATION!

Frac Sand Mining and related industries produce respirable crystalline silica dust which is carcinogenic. Please watch the 2 videos for some recent findings.

*.....keeping watch on
the industry*

Issue: #195
Date: April 17, 2018

**A Message from
Dr. Crispin
Pierce and his
students:**

Our research group has just completed two video clips explaining our work and recent results. The five-minute clip covers the basics of air monitoring and health risk estimates:

[https://kaltura.uwec.edu/media/Finished+Five+Minute+Video 1.mp4/1 ep0ftdtx](https://kaltura.uwec.edu/media/Finished+Five+Minute+Video+1.mp4/1_ep0ftdtx)

The ten-minute video clip also covers our

instruments and procedures for monitoring:

https://kultura.uwec.edu/media/Finished+Ten+Minute+Video.mp4/1_h0j0ksd0

We would be glad to present these results and answer questions in person for interested groups. Please feel free to share these links and this invitation to all who may be interested.

**Best regards,
Crispin**

Please invite Dr. Pierce and his students to your next meeting; share this message with your friends and relatives. Include your church officials, health officials, and others who might have an interest in sharing the most current scientific findings regarding air quality issues around frac sand mines and related industries.

**Crispin Pierce, PhD
Associate Professor and Program Director
Environmental Public Health Program
University of Wisconsin-Eau Claire
105 Garfield Ave.**
