

Citizen Science can help Scientists do their Work

*.....keeping watch on
the industry*

Issue: #263
Date: May 1, 2019

**Greetings to the readers of the Frac Sand Sentinel:
If you did not have the time or opportunity to
attend the Project Outreach Event in Arcadia, WI
on April 13, the video is now available.**

**The Trempealeau County Community TV was
kind enough to send me a link so you could view
it. Dr. Pierce, his interns and students, are at work
in this video studying the data and analyzing it to
find outcomes. Take a look and learn a great deal
about some of the air quality science
being conducted at the University of WI-Eau Claire
to check out health concerns near mines,
processing plants, and trans-load stations in NW
Wisconsin.**

Here is the site:

**[http://www.trempealeaucounty.com/tchome/misc/archived
video.aspx?QSID=3187&Video=1](http://www.trempealeaucounty.com/tchome/misc/archived_video.aspx?QSID=3187&Video=1)**

Organizing can bring people together, create power, and bring about CHANGE!

"What kind of CHANGE can organizing make?"

Change is specific, concrete, and significant. It requires focus on goals that will make a real difference that we can see. It is not about "creating awareness," having a meaningful conversation, or giving a great speech, although those may contribute to an organizing campaign. It is about specifying a clearly visible goal, then mobilizing your resources to achieve it." *

***Originally adapted from the works of Marshall Ganz of Harvard University from the Workshop Guide for WILD (Wisconsin Leadership Development)**
