

How are investors feeling right now about the frac sand mining issues?

*.....keeping watch on  
the industry*

Issue: #266  
Date: May 15, 2019

**How ethical or  
moral is it to leave  
mining facilities  
open to the winds  
during  
intermittent  
mining  
when fine  
particulates can  
cause health  
issues among**

**residents? Air and water resources can be  
compromised under these conditions resulting in  
health issues for local folks. Is your county health  
department involved and speaking out about the  
health and safety of the people they care about in  
your county?**

**Frac sand mines and related facilities are**

remaining closed in many areas of Wisconsin after winter's passing. The article in the link below will enlighten the reader on why many facilities are still in intermittent mode. No one is overseeing the facilities as no one is employed. Wind erosion takes over and carries the precious cargo off into the winds from the facilities that have just left piles of silica in an unprotected state. A breach can occur due to heavy rains.....and citizens may be the only whistle blowers available to report such incidences.
