

COMPARE THE WISCONSIN STORY WITH THE TEXAS STORY!

*.....keeping watch on  
the industry*

Issue:#271  
Date: JUNE 4, 2019

This program came out of Boston. It was sent by a friend who lives in New Hampshire. You might want to compare yesterday's story out of WPR with this one.

**We hear about the mining of Texas brown sand which is used in the hydraulic fracturing fields in Texas. There is some concern about the quality of the Brady Brown vs. the Northern White that comes from the hills, ridges, and bluffs of Northwestern Wisconsin. There has been a change recently in mining the Brady Brown. Read about it at the site noted below.**

**And there is more:**

**Hill Country Town Picks Up Pieces After Sand Plants Head West | KUT**

<https://www.kut.org/post/hill-country-town-picks-pieces-after-sand-plants-head-west>

**Rather than asking the question about the future of frac sand mining, maybe we should ask the question: what is the future of hydraulic fracturing? The uncertainties associated with the industry would make one wonder if it is worth hanging one's hat on making a steady income by**

# **continuing to work with so many changes that don't always assure steady jobs!**
