

Site pictures are outstanding!

*.....keeping watch on  
the industry*

Issue:#277  
Date: June 25, 2019

**VIDEO TAKEN AT  
VFW HALL ON  
JUNE 18, 2019**

**AFSCME Retirees,  
Chapter 32, Subchapter 63 invited their members  
and the general public to hear Dr. Crispin Pierce  
and his students (Connor, Aleah, and Jozie) share  
information and answer questions about air quality  
as related to frac sand mining; 41 people attended  
the gathering. The discussion was varied and  
lively and everyone came away with a better  
understanding of the scientific work which is  
occurring at various sites to collect data on  
particulates in the air.**

**David Erickson from Erickson Digital Studio in the  
Cudahy, Wi area, videotaped the event. His  
expertise is in Architectural Photography.  
You can watch the video he produced at:**

[https://www.dropbox.com/s/6kplns0wo52lv6e/UW-EC\\_Part particulateAirSand.mp4?dl=0](https://www.dropbox.com/s/6kplns0wo52lv6e/UW-EC_Part particulateAirSand.mp4?dl=0)

**If you were unable to attend this learning session, you will find this video very enlightening! You will learn a little more about the use of Purple Air Monitors to capture data and at the same time learn more about the impact of respirable crystalline silica dust on longevity and the health of those living near frac sand mines and other frac sand facilities.**

**Take a look.....**

**And thanks, David, for sharing your expertise with many who would like to know more! You are doing great work!**

**And thank you, too, to the AFSCME Retirees for the invitation to hear Dr. Crispin Pierce speak and also to allow public attendance.**
