Date: July 31, 2019

Particulate Air Quality Around Wisconsin Frac Sand Mines #285 B

**A Presentation by
Dr. Crispin Pierce and His Students and Interns on
Thursday, August 15th, 2019, in Black River Falls.**

**Public Lab Representatives will also be present to
give you more information on the Sand Sentinel
Program and invite you to participate!**

Come join us for our presentation at the
Skyline Golf Course in Black River Falls, WI

612 N 11th Street

Black River Falls, WI 54615

Presentation Itinerary: **August 15th**

5:30 - 5:40 Welcome and Introductions

5:40 - 6:30 Particulate Air Monitoring Presentation

6:30 - 6:45 Break and door prizes

6:45 - 7:30 Sand Sentinel Presentation-Public Lab and
Project Outreach

We have been measuring air quality around frac sand operations, meeting with community groups, the DNR, academic colleagues, community organizations, such as Save the Hills Alliance, and industry representatives over the last nine years.

The act of sand mining and processing sand for hydraulic fracturing generates particulate matter that becomes airborne. Our aim is to quantify the risk of ambient exposure to airborne particulates around the industrial silica sand operations so that communities and decision-makers can be well-informed of their air quality.

It is our hope to address your concerns, to provide our expertise and knowledge of this subject, and to help concerned citizens such as yourselves with community education and interpretation of data from our new Purple Air Monitors.

For any questions please contact:

Dr. Crispin Pierce: piercech@uwec.edu (715) 836 5589

Public Lab Professionals including Stevie and Joe will be present at this meeting. They and members of Project Outreach will help participants attending the workshop to use recently developed Sand Sentinel materials. Copies will be available for all. Opportunities for interactive learning will be available.

**Refreshments and a light lunch will be available.
Door prizes will be offered to participants.**

We invite everyone from counties surrounding this area and beyond to attend. You will be able to have your questions answered, meet new friends and neighbors, and learn more about what is occurring using the grant funds obtained by Project Outreach this past spring, not only from a funding source but also from Public Lab over the course of this year.

Please share this important information with your family, friends, neighbors and other associates and invite them personally to attend!!!! We are all connected! We must work together!
